

- More efficient dock operation
- Minimizes trailer walk
- Optimized plumbing system

More efficient dock operation

DST[®] delivers an integrated system that gives fleet managers and owner operators a simple, lightweight answer to trailer walk and drop issues for more efficient dock operations, maximum productivity and performance.

DST is automatically engaged with the activation of the parking brake allowing air to quickly exhaust from the air spring so the trailer rests on the air spring bumper to eliminate further trailer movement.

Optimized plumbing system

Available on most VANTRAAX[™] slider systems, DST provides an optimized plumbing system including our patented HCDDV Height Control Differential Dump Valve, the first fully integrated trailer height control valve and differential dump valve combination. The HCDDV combines all of the performance advantages of the standard Hendrickson HCV height control valve with exhaust capabilities unmatched by add-on or remote dump valve configurations.

DST® Dock Stabilizing Technology™ Dock Solutions

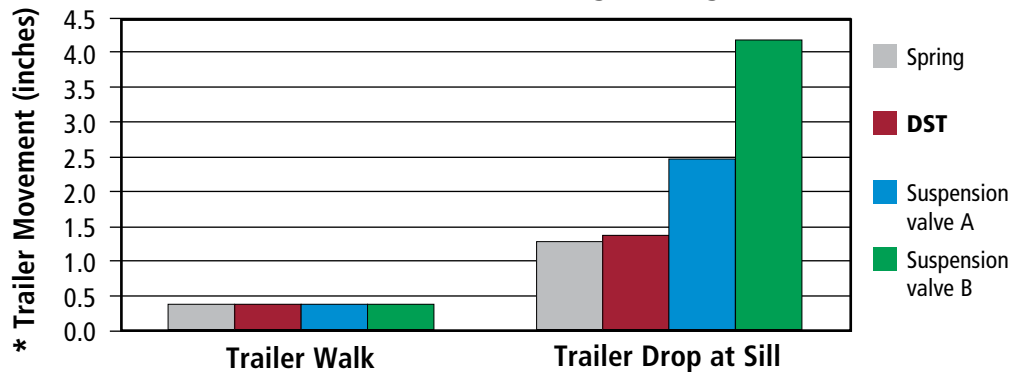

DST technology drives more efficient dock operations.

DST Dock Stabilizing Technology Trailer Walk & Trailer Drop

With activation of the parking brake, DST automatically exhausts twice as fast as traditional configurations. This allows the trailer to rest on the air spring bumpers before the parking brakes fully engage, thus eliminating further trailer movement.

Trailer Performance During Loading

* Data collected from a typical van trailer during loading.

NOTE: "A" and "B" are air suspensions with different automatic dump valves

Actual product performance may vary depending upon vehicle configuration, operation, service and other factors.

All applications must comply with applicable Hendrickson specifications and must be approved by the respective vehicle manufacturer with the vehicle in its original, as-built configuration. Contact Hendrickson for additional details regarding specifications, applications, capacities, and operation, service and maintenance instructions.
