Industry

HENDRICKSON **AERO BRIGHT™**

Hendrickson, the leading supplier of bumpers to the commercial trucking industry, has put the “shine” on the non-metal bumper market with the introduction of the HENDRICKSON AERO BRIGHT™ (HAB™) bumper. Just as the Hendrickson metal bumpers are leading more trucks down the road, adding the HENDRICKSON AERO BRIGHT to the current line of products will provide the most comprehensive range of bumpers (both metal and non-metal) to the trucking industry. Behind the brilliant “chrome-like” finish, the HENDRICKSON AERO BRIGHT bumpers deliver durability and high impact resistance in a lightweight package not found on other non-metal bumpers available in the market today.

A “BRILLIANT” and Innovative New Material

Hendrickson combined the industry’s leading weatherable film technology and advanced lightweight engineered thermoplastics with a unique manufacturing process to create HENDRICKSON AERO BRIGHT. This technology enables Hendrickson to provide the best of both worlds — the styling features, durability and lightweight characteristics of traditional plastic coupled with the luster of chrome.

Beyond Bumpers

The same technology used in HENDRICKSON AERO BRIGHT bumpers provides Hendrickson customers with the unique opportunity to explore other avenues such as grill surrounds, light bezels, sunvisors and other components of the truck. Contact your OEM for the availability of these products.

For The Road Ahead™

 **HENDRICKSON**

How tough is HENDRICKSON AERO BRIGHT?

Just ask L & S Cartage quarry driver William Youngs. William's truck #232 has been running a HENDRICKSON AERO BRIGHT bumper for over a year.

"It has proven to be extremely tough for the abuse it goes through. It's constantly in lime, it's constantly having stones bounced off it, and it looks brand new. You can't beat it."

Questions and Answers

Q: Why should I buy HENDRICKSON AERO BRIGHT?

A: HENDRICKSON AERO BRIGHT is the industry's solution for a chrome-like, styled and lightweight non-metal bumper. Along with its UV resistant weatherable protected finish, HENDRICKSON AERO BRIGHT offers durability and ease of maintenance.

Q: Will I need to purchase additional brackets to install HENDRICKSON AERO BRIGHT bumpers?

A: No, all HENDRICKSON AERO BRIGHT bumpers have been specifically designed for ease of installation utilizing factory mounts and hardware.

Q: How durable is HENDRICKSON AERO BRIGHT?

A: Through extensive lab and field-testing including gravelometer and 500 hour salt spray, HENDRICKSON AERO BRIGHT has proven to withstand the rigorous environment of some of the most extreme driving conditions on the road today.

Q: How do I care for HENDRICKSON AERO BRIGHT?

A: HENDRICKSON AERO BRIGHT has a clear coat similar to your car or truck. To protect and maintain the shine and luster of your bumper, Hendrickson recommends the use of an off-the-shelf polish or wax combination you would use on the painted surfaces of your car or truck. Follow the manufacturer's instructions on the product of your choice.
