 **HENDRICKSON**
The World Rides On Us™

For your Freightliner

The HENDRICKSON AERO BRIGHT® (HAB™) sunvisor delivers style, durability, aerodynamics and reduced weight for your Freightliner Business Class M2. It matches and complements available chrome options, and the HAB material provides resistance against UV rays, weather and corrosive materials.

Part Number

22-64071-000 — Day Cab

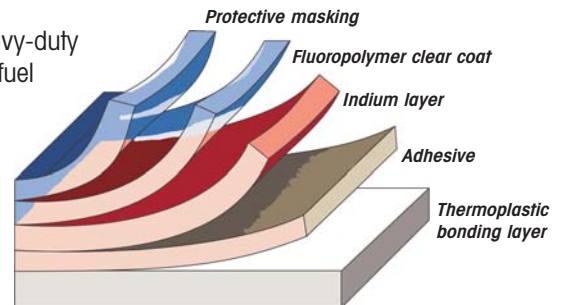

22-64071-001 — Crew Extended Cab

Alternative technology brings benefits to truckers and the environment

Delivering a brilliant “chrome-like” appearance, HENDRICKSON AERO BRIGHT® (HAB™) provides durability and high-impact resistance not found in other non-metal bumpers, grills and headlight bezels.

In addition HAB plays a double role in bringing a “greener” alternative to the heavy-duty trucking industry. Weight reduction remains a vital element as you try to reduce fuel consumption, and the technology behind HAB provides a cleaner manufacturing alternative to hexavalent chrome plating.

Hendrickson works with Soliant LLC of Lancaster, S.C., to bring the trucking industry HAB mirror-finish bumper and trim components. The brilliant film in HAB meets the Global Plastics Environment Conference (GPEC®) award criteria for “Sustainability and Recycling for a Greener Environment.”
