

- Operational flexibility
- Improved maneuverability
- Maximized payloads

Lift Your Bottom Line

Hendrickson's UBL™ UNDER BEAM LIFT™ kits allow fleets and owner-operators to put the advantages of INTRAAX®, VANTRAAX® and HT™ Series to work in liftable applications. Liftable axles offer operational flexibility, help extend tire life, improve trailer maneuverability, carry more payload and save on road tolls. When combined with INTRAAX, UBL provides an efficient, lightweight integrated lift system.

Easy Assembly

Select INTRAAX models feature a self-locating, bolt-on frame bracket mount that eases installation by eliminating tedious positioning and labor intensive welding. It is also compatible with corrosion protective frame bracket coating options, allowing you to specify galvanized coating if needed.

UBL™ UNDER BEAM LIFT™ Features and Benefits

- **Lightweight**

At less than 75 pounds, the UBL is lighter than other lift mechanisms on the market

- **Compact**

The small package attaches easily to existing hangers and leaves plenty of room for auxiliary equipment

- **Durable**

Manufactured with the same rugged craftsmanship that has made our suspensions the industry standard

- **User-friendly**

Simple to install and operate and easy to retrofit on INTRAAX® and HT™ Series models

- **Low maintenance**

With fewer moving parts than other lift products, UBL helps deliver years of trouble-free service
