

INTRAAX® AAEDT/AAEDL

A world leader in trailer air suspensions, Hendrickson delivers an advanced integrated 30,000-pound structural capacity system for severe-duty and heavy-hauling applications.

INTRAAX® extreme-duty systems meet fleets' demands for tough off-highway and other severe operating environments where maximum strength and durability are required. Ride heights range from 14 to 17 inches for the top-mount (AAEDT 30K) and from 9 to 19 inches for the low-ride height / liftable (AAEDL 30K).

Extreme-duty systems give the muscle needed for rigorous off-highway and heavy-hauling applications including loggers, chip vans, dumps, tankers, straight and drop-deck platforms and specialty trailers. Rugged features include low-pressure air springs with steel pistons, high-damping, extended-service shock absorbers and a 30,000-pound capacity axle. Heavy-duty options include rear-mount shock absorbers and chain down-stops for maximum suspension damping and control.
