

EXPERTISE YOU CAN TRUST

- Wheel-End Installation You Can Rely On
- Engineered to Maximize Uptime
- Single-Source Support for Manufacturers and Fleets

From one of North America's most experienced wheel-end installers.

RTR[®]
READY-TO-ROLL[®]
Wheel-End Packages

At Hendrickson, wheel-ends are more than just another component. They are one of the areas where trusted experience and proven expertise truly show. The volume of wheel-ends installed by Hendrickson across North America reflects years of hands-on expertise, careful assembly and a strong commitment to keeping fleets moving.

Hendrickson's HXL extended-life wheel-end packages are built with efficiency and uptime in mind. They help trailer manufacturers produce high-quality trailers and give fleets the reliability they need out on the road.

Why Hendrickson Wheel-Ends?

Built With Experience

As one of North America's leading trailer wheel-end installers, Hendrickson equips a high volume of trailers with consistent, high-quality assemblies.

Designed for Efficiency

Hendrickson wheel-ends are engineered to help reduce downtime and support long-term performance for fleets.

Single-Source Convenience

Product expertise, technical support and warranty resources all come from one place, making communication simpler and service easier to manage.

Protected for the Long Haul

HXL wheel-end packages are engineered for long-term trailer performance, offering low-maintenance solutions like HXL7[®] with Outboard Mounted Rotor that allows rotor service without disturbing the wheel end.
