| 4g | Type of Road | Off road |

Customer view on product:-

Vehicle -LPK 2523 with ULTIMAAX suspension used for 9 days, we found that the suspension is fit for our work; it carried the amount of load (25T) efficiently. Vehicle ride comfort is also found ok. No vehicle vibration was found, the stability of the vehicle was superb. No break downs observed during this tenure, no greasing done, no Maintenance work carried out during the time. In spite of rainy season no slippage no traction loss found .vehicle achieving well ground gripping.

We recommend using this suspension (ULTIMAAX) for our better business growth.
